Appendix (c): DEAF/HARD OF HEARING (D/HH).

Definitions.

A child who is deaf or hard of hearing is one who exhibits a hearing loss that, whether permanent or fluctuating, interferes with the acquisition or maintenance of auditory skills necessary for the normal development of speech, language, and academic achievement and, therefore, adversely affects a child’s educational performance. [See 34 C.F.R. § 300.8(c)(3) & (5)]

1. A child who is deaf can be characterized by the absence of enough measurable hearing (usually a pure tone average of 66-90+ decibels American National Standards Institute without amplification) such that the primary sensory input for communication may be other than the auditory channel.

2. A child who is hard of hearing can be characterized by the absence of enough measurable hearing (usually a pure tone average range of 30-65 decibels American National Standards Institute without amplification) that the ability to communicate is adversely affected; however, the child who is hard of hearing typically relies upon the auditory channel as the primary sensory input for communication.

Eligibility and Placement.

1. The eligibility report shall include audiological, otological and educational evaluation reports.

   (a) Audiological evaluations shall be provided with initial referral. Children who are deaf or hard of hearing shall have an audiological evaluation administered by a certified/licensed audiologist annually, or more often if needed. The annual audiological evaluation shall include, but is not limited to: an otoscopic inspection, unaided and aided pure tone and speech audiometry (as applicable), immittance testing, word recognition, hearing aid check and electro-acoustic analysis of the hearing aid (if amplified), an analysis of a frequency modulated (FM) system check (if utilized). A comprehensive written report shall be included in the audiological evaluation. This written report shall include, but is not limited to: the date of the audiological evaluation, description of the results of the audiological testing, an amplification evaluation including the child’s ability to understand spoken language with and without amplification, as well an interpretation of the results as they apply to the child in his or her classroom setting.

   (b) An otological evaluation report from appropriately licensed or certified personnel is required at the time of initial placement in the program for the deaf/hard of hearing. The otological evaluation report is required as medical history pertinent to the absence of hearing. If such a report is not available upon initial placement, it shall be obtained within 90 days of placement. The initial or most recent otological evaluation result shall be summarized and that otological evaluation report shall be attached to the eligibility report.

   (c) A comprehensive educational assessment shall be used in the development of the child’s individualized education program (IEP). The educational evaluation shall include
assessment data from more than one measure and shall include, but is not limited to, information related to academic/achievement levels, receptive and expressive language abilities, receptive and expressive communication abilities, social and emotional adjustment and observational data relative to the child’s overall classroom performance and functioning.

2. A psychological evaluation, using instruments appropriate for children who are deaf or hard of hearing, is recommended as part of the overall data when eligibility is being considered.

3. Children who exhibit a unilateral hearing loss may be considered for eligibility provided documentation exists that indicates academic or communicative deficits are the result of the hearing loss.

Additional Requirements.

1. An evaluation of the communication needs of a child who is deaf or hard of hearing shall be considered in the program and class placement decisions. An evaluation of a child’s communication needs shall include, but is not limited to: language and communication needs and abilities, opportunities for direct communication with peers and professional personnel in the child’s preferred language and communication mode, severity of loss, educational abilities, academic level and full range of needs, including opportunities for direct instruction in the child’s language and communication mode.

2. Any classroom to be used for a child who is deaf or hard of hearing shall be sound-treated and present an appropriate acoustical environment for the child. All placements, including regular education placements and desk arrangements within classrooms shall be made so that environmental noise and interruptions are minimized.

3. Recommendation of the appropriate educational environment, including acoustical considerations, should be made by the IEP Team.

4. Each LEA shall have written procedures to ensure the proper functioning of assistive amplification devices used by children who are deaf or hard of hearing. These procedures shall include the designated qualified responsible personnel, daily and ongoing schedules for checking equipment, as well as follow-up procedures.
