Appendix (b): DEAFBLIND (DB).

Definition.

Deafblind means concomitant hearing and visual impairments, the combination of which causes such severe communication and other developmental and educational needs that they cannot be accommodated in special education programs solely for children with deafness or children with blindness. [34 C.F.R. § 300.8(c)(2)]

Eligibility and Placement.

1. For a child to be determined eligible for placement in special programs for the deafblind, the child shall have current optometric or ophthalmological examination and an audiological evaluation, all administered by qualified professionals. Children who are deafblind shall have an audiological evaluation administered by a certified/licensed audiologist annually, or more often if needed. The annual audiological evaluation shall include, but is not limited to: an otoscopic inspection, unaided and aided pure tone and speech audiometry (as applicable), immittance testing, word recognition, hearing aid check and electro-acoustic analysis of the hearing aid (if amplified), and an analysis of a frequency modulated (FM) system check (if utilized). A comprehensive written report is required indicating the dates of the audiological evaluation and a description of the results of the audiological testing and amplification evaluation. In addition, the report should include a description of classroom environmental modifications which will assist the individualized education program (IEP) team in making instructional decisions, the child’s ability to understand spoken language with and without amplification, and an interpretation of the results as they apply to the child in his or her classroom setting.

2. Children who are deafblind may receive educational services in classes with other disabled children; however, the class-size ratio for deafblind shall be maintained.

Additional Requirements.

Each child who has been diagnosed as deafblind shall be reported in the Georgia Deafblind Census.
