N/A	The text of the rule from pages 1-13 provides guidance for coding the list of state funded subjects and courses. Changes include the following: a) reference to the State Board of Education, b) reference to the Georgia Department of Education website, c) the year that courses listed shall become effective at the beginning of school year 2012-2013, d) a note regarding access to courses for students participating in the Georgia Alternate Assessment Program, the deletion of coding for "Access" courses, and the deletion of the listing of "Access" Courses on pages 11-13 and throughout the rule.	Additions, deletions, and edits are indicated with strikethrough and underline on pages 1, 6, 7, 11, 12, and 13.
N/A	Students with Disabilities who participate in the Georgia Alternate Assessment (GAA) have access to all state-funded courses. These students will continue to be coded as described in the rule using either the number eight or nine as the first digit to the right of the decimal in a course number. The coding utilizing the number five in the fourth numerical digit is not necessary and has caused confusion in the districts regarding the purpose of this coding. Note: When the .8 and .9 are used with a course code for a student with a significant cognitive disability participating in the Georgia Alternate Assessment (GAA), the instruction will align to the standards for that course and provide access to those standards. Instruction must embed IEP objectives, but will not necessarily address all the standards for the course or cover the same depth and	Addition/Deletion - Clarifying Language for Access Courses - Deleted Access Course Titles from pages 11-13 and throughout the course listing
